

# SLA BATTERIES

SEALED LEAD ACID

### Deep Cycle

Best suited for heavy use cyclic (everyday use) applications.

Duracell® Ultra Deep Cycle AGM Batteries are designed to achieve maximum cycles throughout the life of the battery. Duracell® Ultra Deep Cycle AGM Batteries maintain their high capacity with a design that is resistant to deep discharge. Whether you are in a boat or working on the warehouse floor, you can count on Duracell® Ultra Deep Cycle AGM Batteries to keep you running.

### APPLICATIONS

Wheelchairs  
Mobility Scooters  
RV Power

Floor Scrubbers  
Golf Carts  
Fishing Equipment

## DURACELL® ULTRA

### Cycle Life

150-250 cycles at 100% discharge - 40% more cycles than general purpose batteries in the same applications.

### Spillproof Design

Unique design construction and sealing techniques guarantee leak-proof operation.

### Maintenance Free

Maintenance-free design and manufactured in compliance with the quality management system standard of ISO 9001.

### Nationwide Warranty

If something goes wrong, we want to make it right. Return the battery to any Batteries Plus location nationwide and our experts will take a look.

### Account Benefits

### Delivery

We drive to you, and meet you on your time, which means your focus stays on running your business.

### Recycling

We recycle according to your municipality's ordinances. Go green.

### Case Quantities

Commercial discounts and volume pricing available through your local store.

### Maintenance & Storage

Be sure to properly maintain your battery to ensure the best and most reliable performance. SLA battery chargers available.

Recharge after each use and store battery fully charged.

Do not store in a discharged state. Charge batteries every couple months.

Overcharging kills batteries.

Disconnect charger once fully charged.

Check battery for corrosion or deformation.

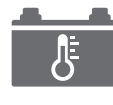

If battery doesn't hold a charge, have it tested.

Store in cool, dry place (68°F is best).

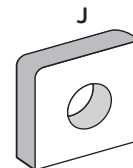

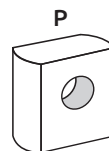

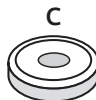

Charge the battery every couple months when in storage.

If battery is stored in higher temperatures, charge it more frequently.

### Terminal Types

Each battery has a different terminal type; yours will depend on which application the battery supports. Be sure to get the right one.
