

Metal halide is a type of lamp that relies on the heating of a mixture of gases to provide incredibly bright light, comparable to actual daylight. Depending on your lighting needs, consider metal halide lamps over halogen and other lighting sources for excellent light quality, energy efficiency, and longer lifespan.

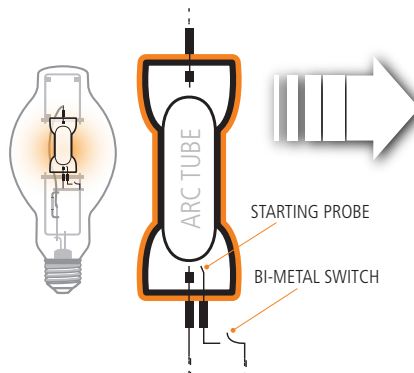

Features:

- Long life - up to 10,000 hours
- Universal operation to perform in any orientation
- Good color rendering
- Choice of clear or coated for different lighting effects
- Lead free glass
- Can be used in either open or enclosed fixtures

We can help you retrofit your older probe start lamps to the new more energy-efficient pulse start lamps.

Probe Start

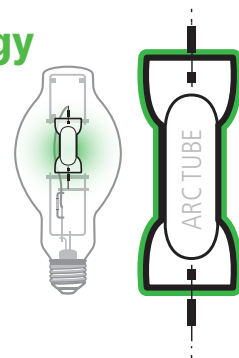

- Most Common HID Start Method
- Proven Technology
- High Wattage 175+

New Technology

Pulse Start

- Lasts 50% Longer
- Improved Lumen Maintenance
- Same Lumens, Lower Energy

Metal Halide
